Redstone sires the type and kind of progeny that work for the cow calf operations as well as the feeder. His dark red progeny perform well at weaning and yearling and include good carcass traits as a bonus. He has sired 120 plus progeny with an 81-lb BW average, 101 WW ratio and 104 YW ratio. He also has young daughters in production that we really like.

2069 was the high selling bull in the 2013 Flat Water Gang's sale. We really like how this bull is put together and how he has maintained his condition throughout the breeding season. We have used 2069 for three breeding seasons and have put him with 80-90 head of heifers that were time AI bred and we were pleased with his conception rates. The heifers that were bred to him were pastured calved and checked twice a day reflecting his calving ease.

We are very pleased with our Admiral 3411 progeny. He has crossed very well on our genetics and has brought us moderate birth weight, above average weaning and yearling weight. Along with the above traits, the progeny are moderate framed, thick made and easy fleshing cattle. His offspring ratio as good if not better than the highly proven AI sires we are using. We are calving his first daughters this year and will be making many more of them because of their fleshing ability, good dispositions, udder structure and good feet. He is owned with Sandbur Ridge Red Angus.

Dominator has met and exceeded our expectations in offering progeny that are moderate framed, deep, thick and once again above average performance. When you study his EPD's he is very well balanced across the traits leaving him with very high marks in the HerdBuilder and GridMaster indices. We are pleased with the first daughters that we are calving this spring they are going to make the right size of cow and have good udders and dispositions. He is owned with Beckton Red Angus.

MLK CRK
 SHEBA 1014,
 dam

Advocate is a bull that we kept out of our 2015 sale to replace his sire. When you look at his individual performance I don't know if we have ever raised an animal that hit all the marks like he did. When you study his pedigree you will find that his sire is a maternal brother to 5L Bourne that has done so well for the 5L program. His Dam produced the 2nd high selling bull in last year's sale going to Westphal Red Angus in Grass Range MT. His first calf crop in this offering has performed very well from weaning to yearling and carcass as well. His picture was taken 10 days prior to pulling him from cows. We had put him in with 57 head of wet two year olds with heifer calves and he had settled over 50 of them. His only flaw was when we pulled bulls this summer and he thought he could pick a fight with Legend 2069. It didn't end well with his hind leg broke above the hock. We have him at World West Sires trying to collect semen on him. Progeny will be limited in the future due to the semen that we have on hand.

Top Dollar Angus Feeder Program

Top Dollar Angus is a genetic-certification and marketing company focused exclusively on the top 25% of the industry in carcass and growth Angus and Red Angus-influenced feeder cattle. Top Dollar Angus is a program similar to other popular branded-beef programs, except that Top Dollar Angus does its "branding" in the feeder cattle and calf market.

Qualified herds must have two or more generations of Angus (Black or Red) genetics with growth and carcass traits objectively ranking in the top 25% of the breed based on documented historical sire use. DNA evaluation, conducted by Zoetis or GeneSeek, is another workable method to qualify. Once your cattle have met the necessary requirements, they will be marketed under the Top Dollar Angus brand and logo, and will be promoted aggressively to a large number of feed yards and buyers. In today's market, Top Dollar Angus cattle are seeing premiums ranging from \$30 to \$70 per head above the average market.

Why the premium? Cattle feeders know that Top Dollar Angus cattle perform better and have higher grid-based carcass rewards compared to other cattle. This puts more dollars per head into the cattle feeder's pocket, which can be passed back to the producer in the form of premiums paid above market price.

Top Dollar Angus helps take the guess work and surprises out of growing and feeding cattle. Feed yards are tired of unpredictable performance and wide-ranging profitability results from group to group on cattle they purchase. Cattle often look the same and have the same colored hides, but are very different genetically. That's why the genetic certification of high-end Angus and Red Angus feeder cattle is here! The industry must differentiate the best Angus and Red Angus genetics from average cattle, and that's what Top Dollar Angus will do for you!

If you have consistently invested in high-performance Angus or Red Angus genetics, Top Dollar Angus will make your cattle stand out from the pack and get you the premiums you deserve. No matter how you market your cattle, our goal is to create more demand and higher prices for your calves.

Kenny Stauffer, general manager • 308-641-0429

6204 is another stout made Fusion that is one of the highest gaining bulls on test with a very moderate birth weight. Bulls like this should produce the type of cattle that the feeders want a lot of and yet his dam is the right type of cow for eastern Montana.
